Like:

- Use of map is quite aesthetic
- The multiple views
- Like the menu nav at the bottom
- The comments under the tiles
- The way the dollars are shown and faded out

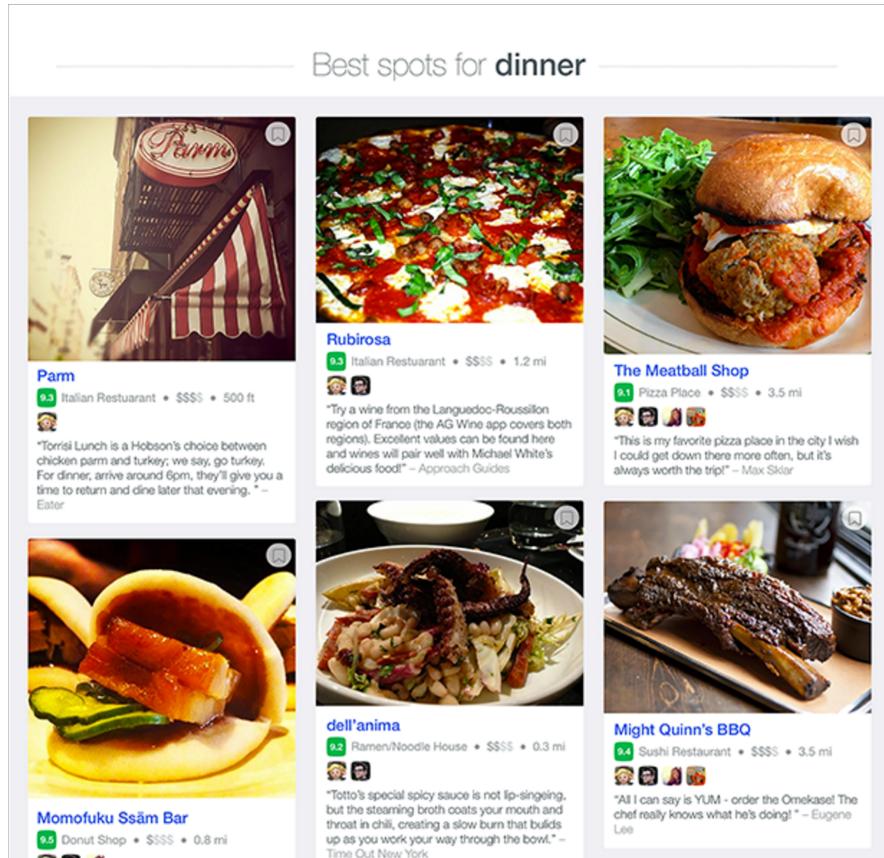

Dislike:

- Don't like how much real estate is used for the map, not always best UI
- The pin design on the map
- Dollars would be better if coloured
- The ratings should be more prominent

Ideas:

- Maybe use split views, option for enlarging the side list into a responsive open view? (Openable caret on the left)

Like:

- The header with the left / right greying
- The tiles, the header image is really nice

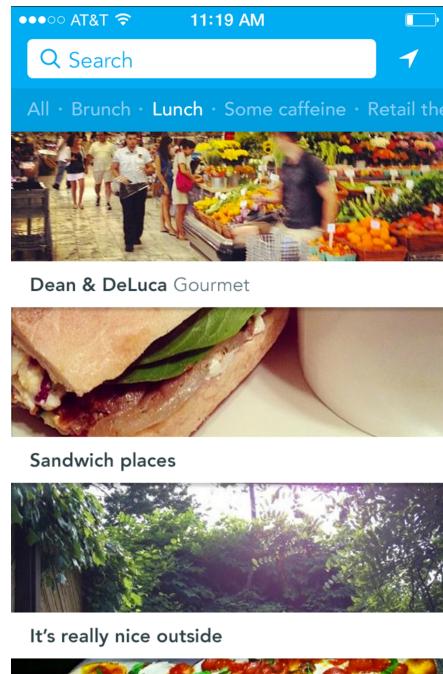

Dislike:

- A little hard on the eye with the jaunty design, a list would be uglier but easier to work out what's going on

Ideas:

- By filtering down the areas, this interface would be much easier to navigate

Like:

- The grouping by category

Dislike:

- That you have to click down into each category to get

Map showing Manhattan and surrounding areas with numbered pins indicating food spots. The map includes labels for various neighborhoods like Hell's Kitchen, Times Square, Chinatown, and Brooklyn.

Like:

- Using images, not just text for filters
- Clean interface
- The size of the left search is big enough, with lots of images
- Nice clean and simple font
- Blue UI for the title is pretty nice as it's similar to the style of general HTML links, nice and standards compliant!
- "See more results" at the bottom
 - Nice performance feature

Dislike:

- No pointer on the hover of the tiles? (Weird as it's clickable)
- Filters using images take up a lot of real estate
- Fonts are quite small, the tiles have a lot of content, a little hard to know what is what
- The scroll is on the right! (what?!)
- No distinction between the tiles, needs grey border IMO
- No options for different

Ideas:

- Performance would be nice to have an infinite scroll on the left

<https://www.just-eat.co.uk/area/n7-holloway>

The screenshot shows the Just Eat website interface. At the top, there's a red header bar with the 'JUST EAT' logo, a 'Log in' button, and a 'Help' link. Below the header, the page title is 'Home ▶ N7 Holloway'. On the left, there's a sidebar with filter options under 'Refine' and 'SORT BY'. The 'Refine' section includes dropdowns for 'Best match', 'Distance', 'Newest first', 'User rating', and 'Restaurant name'. The 'SORT BY' section includes dropdowns for 'Cuisines' (All, *London Loves*, African, American, Argentinian, Asian, Authentic Pizza, Azerbaijani, Bangladeshi, BBQ, Brazilian food, Breakfast, British, Burgers, Burritos, Cakes, Caribbean, Chicken) and 'Price' (1, 5, 9, 15, 23). To the right of the sidebar, there's a search bar with the placeholder 'Search by restaurant name' and a magnifying glass icon. Below the search bar, it says '327 takeaway restaurants in N7 2NT Holloway' with a 'change location' link. The main content area displays a list of restaurants with their names, logos, ratings, addresses, delivery information, and a 'View menu' button. The restaurants listed are: Round Square (Sponsored, 4 stars, 12 reviews), Shish Shack (Sponsored, 4 stars, 1344 reviews), City Pizza (Sponsored, 4 stars, 459 reviews), Pizza Direct (Sponsored, 4 stars, 102 reviews), Pizza Hot Fried Chicken (Sponsored, 4 stars, 3854 reviews), and Firezza Highbury (Sponsored, 3 stars, 104 reviews).

Like:

- Left panel filters
- The way the left panel filters are the same colour as the background, but have highlighted pills
- The total of the results found

Dislike:

- View menu button takes up a lot of real estate
- Left panel of filters isn't individually scrollable
- Lots of filters is a little overwhelming
- Have to scroll to see which filters you have depressed, not easy to see which ones you have selected at any given time
- You lose the search as you scroll down, can't research easily without scrolling back to the top

Ideas:

- Why isn't the left panel of filters individually scrollable?
